Towards Vax-D Therapy Examination &
Treatment

Bring in this coupon
and receive credit applied toward the examination
& treatment
for your first visit!

NOT VALID FOR SUPPLIES OR MASSAGE.
CAN NOT BE COMBINED WITH ANY OTHER OFFER.

Our Staff at Levinson Chiropractic & VAX-D Center is excited about informing you about a non-surgical medical procedure for individuals who may be suffering from lower back/leg pain due to herniated discs, sciatica discomfort, and/or degenerated discs.

VAX-D is a non-invasive treatment designed and proven to actually decompress the lumbar spine, allowing the damaged area(s) to heal naturally and to return to their normal position(s). The decompression of the lumbar region will actually work to correct the damaged areas rather than masking the symptomatic areas as with most other treatments on the market.

VAX-D is an FDA approved Class II Medical device and is not experimental.

We have a strong commitment to helping individuals become pain free without having to have possible low back surgery. To show our commitment, we are inviting you into our office for a complimentary consultation to see if VAX-D can help resolve your specific low back condition. We are also enclosing a \$100 coupon for you to use towards the examination and treatment on your first visit to our office. If you have been a patient in the past, you may use this coupon towards the examination and treatment on your **first** visit to our office in 2013.

If you or anyone you know suffers from sciatic pain, leg numbness, herniated disc and or low back pain, please call our office as soon as possible to schedule your complimentary consultation at **404-257-0404**. Due to our scheduling demands this is limited time offer.

What do you have to lose? Maybe the pain.....
